Promoting the appropriate education of children with disabilities.

As a family facilitator you have the opportunity to share information with families to empower them to advocate for the most appropriate education for their child. LaPTIC webinars are remarkably cost-effective and convenient. You participate from your home or office, using a regular telephone and a computer with an Internet connection. You have no travel costs, hassle, or commute time.

Because the webinar is live, you can ask questions, either on the phone or via the webinar interface. Whether you are an auditory, visual, or kinesthetic learner, webinars provide a highly recommended and proven opportunity to learn and continue your parent and professional development.

To join us visit our website, www.fhfjefferson.org and click "Trainings and Events." LaPTIC uses "GoToWebinar" to provide online trainings. Once you register for a webinar, you will receive access instructions via email that includes a test to check your computers compatibility. We highly recommend you check your computer's compatibility before logging in so you can resolve any technical issues before joining the webinar.

Be on the look-out for Act 833

The 2014 Louisiana Legislative Session ended with the passage of HB 1015, which was signed into law by Governor Bobby Jindal and now called Act 833. Act 833 will bring changes to how students with disabilities earn a high school diploma. Some of these changes could be monumental. This law goes into effect August 1, 2014, but most school districts, if any, will not have received any training on how to implement the new law. The law has become very controversial and I would recommend you follow it closely.
